HOW TO PRINT THERMAL LABELS VIA USB ON WINDOWS 10?
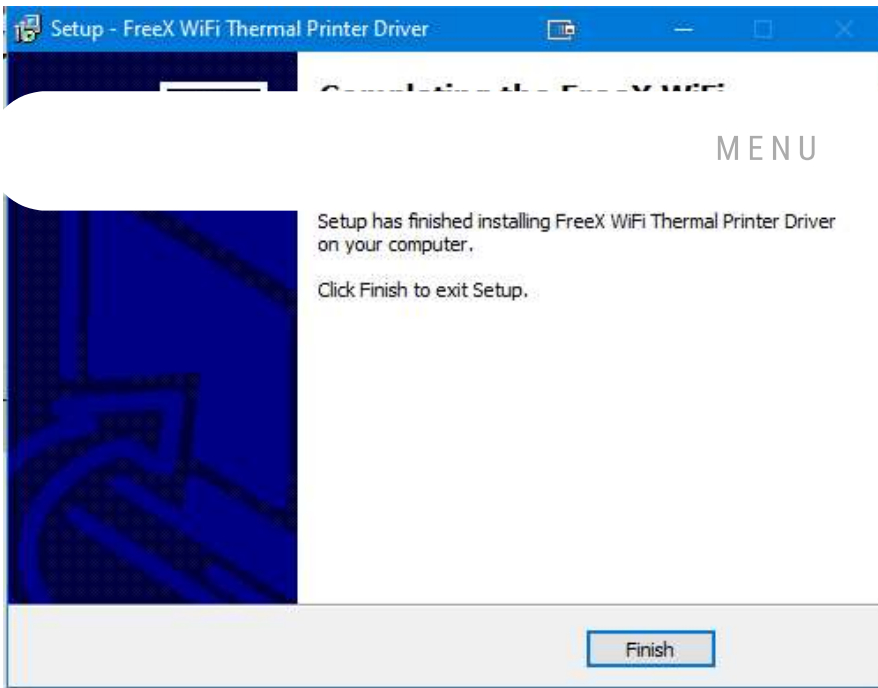

For Windows 10,

1: Download the FreeX Software

Click here to download the latest driver and WiFi Toolbox software.

2: Install the FreeX Driver

- Once downloaded, go in your downloads folder, and unzip the Driver and Toolbox Software you just downloaded

- Click on FreeX Driver and Install it

Setup - FreeX WiFi Thermal Printer Driver

Setup has finished installing FreeX WiFi Thermal Printer Driver on your computer.

Click Finish to exit Setup.

Finish

3: Power on and Connect via USB Port

- Plug in the printer to a power source with the power cable
- Plug in the printer to your computer with the USB cable
- Press shortcut WIN+S, go to "Printers & Scanners"

☑ Let Windows manage my default printer

When this is on, Windows will set your default printer to be the one you used most recently at your current location.

☐ Download over metered connections

To help prevent extra charges, keep this off so device software (drivers, info, and apps) for new devices won't download while you're on metered Internet connections.

If you can't get your printer to work, try running the printer troubleshooter.
